

Motivated programmer with a strong work ethic, ability to learn quickly, and attention to detail while contributing fresh ideas within your organization.

Education

2019-09 -
Current **Bachelor of Science: Computer Science**
University of Advancing Technology - Tempe

Experience

2018-12 -
Current **Lead Sensei**
Code Ninjas Chandler, Chandler AZ

- Teach kids computer programming and robotics (live and online)
- Supervise Employees (Sensei's)
- Create curriculum for students
- Front desk responsibilities
- Weekly onsite instruction at BASIS Chandler Primary North (Pre Covid-19)

Projects

UAT Space Project

The Space Project at UAT includes a team of students from different majors coming together to create a payload housed with electronics that collects data from the atmosphere. My involvement with the program includes assembling the Flight Computer and assisting with the Raspberry Pi's. For the Flight Computer, I designed the circuit board, soldered sensors, and programmed an Arduino to record the data and save it in a MicroSD Card.

Mobile App Competition

A Mobile App competition was held at University of Advancing Technology with the theme of "Time". I created an app that informed the user of different cities and time zones around the world based on their current location. My app won 1st place.
